Reasons not to use Facebook

Why you should not 'use' (i.e., be used by) Facebook.

I have never had a Facebook account. There is a Facebook account called "Richard Stallman", but it is an impostor.

Putting the photo of someone on Facebook (or Instagram) contributes to surveillance of that person. Please don't post any photos there that include me, and I suggest you avoid posting photos of anyone else too.

If you feel your organization needs a "presence" in Facebook [see this page](#).

If you feel you need to be used by Facebook to find out about parties at your school, you might look for someone in your circle who isn't ready to break ties with Facebook, who would undertake to take note of parties via Facebook and send messages to a list of Facebook-rejecting friends to inform them.

Here's [a good article to present many of Facebook's injustices](#) to your friends.
